

Thank you for participating!

Revolutions for Research charity bike ride's inaugural event on September 12, 2021, brought us together to support cancer research being spearheaded at the Arnie Charbonneau Institute in Calgary, Alberta.

Your efforts helped raise important funds to support analytics infrastructure directed towards targeted interventions for individuals and their specific cancer diagnosis. This helps to reduce uncertainty at all levels of care.

Thanks to you, close to **\$50,000** was raised!

As you put away your road bikes for the winter and perhaps turn to spin bikes and other winter-driven activities, planning is already underway for the next charity ride in September 2022. In the coming months, we will be sharing plans for the day as well as details of an exciting new route that will add challenges for seasoned riders and fewer hills for recreational riders.

*Sincere thanks
from the
Cure Cancer Foundation.*
